EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mary Edwards on November 30th, 2005.

The application has been amended as follows:

Claim 6 has been canceled.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The specific limitations of (with respect to claim 7) "...said upper portion including a slit generally parallel to said elongated opening therein and the fold in said sheet-like member...said strip including at least one projection portion sized and dimensioned to extend through said slit in said upper portion of said base portion and to move therealong as said slide member is slidably moved relative to said base portion...said slide member positionable within said slot of said base portion with said projection portion extending through said slit in said upper portion of said base portion when said sheet-like member is in said folded configuration to form an assembled word isolator device..." and (with respect to claim 8) "...said upper portion including an openable slit generally parallel to said elongated opening in said upper portion and the fold in said sheet-like member...said

Art Unit: 3725

strip including at least one foldable projection portion sized and dimensioned, when folded to project from the principal plane of said slide member at an angle thereto, to extend through said slit in said upper portion of said base portion and to move therealong as said slide member is slidably moved relative to said base portion...said projection portion of slide member component extending through said slit in said upper portion of said base portion component when said component is in said folded configuration to form an assembled word isolator device..." are not anticipated or made obvious over the prior art of record in the examiners opinion. For example, Gabay '635 discloses a word isolator device which teaches a viewing window, a slide member within a slot of the device which may be used to partially or fully occlude the viewing window (figures 1-10). However, the prior art of record fails to disclose or teach such a device, kit or template comprising a slit where a slide member has projection portion that fit with the slit such that the slide member is held within the device and is capable of sliding as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
